

The FAA Safety Team presents:

RAC Hangar Flying Night!

Don't be caught without a plan when sudden silence occurs! It's mission essential that every pilot of powered aircraft has a plan for getting down in the event of an engine failure and then survive until help arrives. What's your plan? Does it include all the current recommendations? How do you measure "suitable" terrain for a survivable crash landing? Do you know how to use the airplane structure for self-protection and the protection of passengers? Get the answers to all of these questions and many more from a pilot who survived an emergency off airport landing! Featured speaker Robert Belisario, an FAA Pilot Examiner, will share his experience as well as the techniques and strategies for surviving a forced landing! FREE Dinner courtesy of the Rochester Air Center! Click on the link below to reserve your seat TODAY!

Directions: From Scottsville Road, Turn North on Aztec Drive--across from Dunkin Donuts and RGE. Follow the loop until reaching a parking lot on the north side of the road. From your parking spot, the building will be on the right. Please use the main door closest to the fence.

A message from the National FAASTeam Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at www.FAASafety.gov!
